Description User Manual Reviews

K-10X Ball Head

High-strength aluminum alloy body with an anodized surface gives the ball head superior wear and abrasion resistance.
The ball head is processed with special technique to hold large and heavy setups tightly and securely

Panning base and the vertical notch are all incorporated to take stunning panoramic photos.

The ball lock knob has a scale, which facilitates the setup for different camera gear.

The tension setting knob is designed to prevent the gear from accidentally falling.
