Smokeless Powder, Primers, and Fuses ship from our warehouse with other products. This ensures no more than one Shipping Charge and one HazMat Charge per order (unless you also order products that Ship Separately from MidwayUSA or our Suppliers). While Black Powder ships from our warehouse, in most cases it must ship by itself, therefore it incurs a separate shipping charge. Each order is limited to no more than 20 pounds of Black Powder, and no more than 66 pounds each of Smokeless Powder, Primers, or Fuse. Smokeless Powder, Black Powder, Primers, and Fuses are considered hazardous materials, incur HazMat Charges, and can only ship ground freight within the continental U.S. Due to safety considerations and legal/regulatory reasons, Smokeless Powder, Black Powder, Primers, and Fuses cannot be returned.

Product Overview

Within every Remington primer is a group of subcomponents assembled to exceptionally tight tolerances. Primer cup dimensions are controlled to .0001", and the priming mix is specially formulated for consistent ignition with a wide variety of powder types. Primers are tested for reliability from -20 degrees F to +150 degrees F. The unique tripod anvil design creates a larger strike area with maximum sensitivity, even with off center firing pin strikes.

Q What kind of bullet use for 308 Winchester? And Powder? I see manual data book it said Fed 210M

Asked by Ajluna1 1 year ago

[Add your answer](#)

Product Owner - mpj84

Your data for your load is telling you to use a magnum primer the Remington 9 1/2 is a magnum primer it will work fine. My load is 45 grains of Varget with a sierra gameking bullet 165 grains C.O.I 2.750. Any bullet .308 diameter will work. But if you can't find exact data for a particular bullet I start a grain or two above a minimum load until I see signs of pressure.

Open Reply - Jeff

No. They are quite satisfactory.

[1](#) [0](#)

Q What do the numbers mean on the primers? What is the difference between a small magnum rifle and just small rifle?

Asked by Bill 3 years ago

[Add your answer](#)

Product Owner - jason.sidebottom

Different rounds require different primers. Your reloading manual will indicate which primer to use. The difference in primers will reflect in the amount of power your goin to ignite. Meaning your gonna need a bigger bang for a 300 win mag than your gonna need for a 223.

Q Can you use these primers to load 30-06 springfield?

Asked by Newbie 4 years ago

[Add your answer](#)

Product Owner - mkecardv11

Yes you can. I have used them for 308 Winchester as well as 280 Remington loads with good results. You certainly do not need magnum primers but they will work. My only suggestion is that you use slower burning powders like H4831 and, as usual, start with lighter loads and work your way up observing any signs for excess pressure. Always be safe and err on the side of caution. This is especially true if you are using an older rifle.

Open Reply - Thomas

Yes, they work well.

[7](#) [0](#)

Q with a 308 should you use a small magnum or large magnum primer

Asked by Bill 4 years ago

[Add your answer](#)

Product Owner - donwitmerkean

Depends on the type of case. Most use large rifle, but some (specifically match cases) use small rifle cases.

these primers as good as any.

Used to believe long ago that Federal primers were untouchable in terms of performance. Since switching to Remington primers my accuracy is better, SD is less, velocity has improved and primer pockets stay tighter longer. I load for virtually all types of firearms including extreme long range shooting.

Great primers with great shelf life too!

I bought a 1000 pack carton of these primers in the late 70's for loading my 264 Mag and they are still just as powerful and reliable as when I bought them. The shelf life on these primers is just unbelievable (30+ years old) and no squibs or loss of accuracy or reliability. So don't be afraid to buy extra when you are ordering in order to justify paying the hazmat fee. I have also used these in 44 Mag pistol rounds (after deepening the primer pocket on the pistol cases) and have reliable ignition on those rounds too. I shoot them in a Desert Eagle, which needs a diet of pretty hot loads to reliably function the action and these deliver with it.

Primers do make a ...

Primers do make a difference! Take your favorite pet load(s) and sample several different primers and see!The Remington 9 1/2's and CCI BR's have consistently proven to be the most accurate loads I've assembled. Federal Match and Winchester LR come in slightly behind and I no longer bother with the rest.
