There's a reason the VX®-3i 3.5-10x40mm has been one of the most popular models for decades; it just plain works in almost any hunting environment. Tight brush and long-range shots are no problem with this extremely versatile magnification range.

What do hunters want most in a scope? Outstanding performance in low-light conditions and an incredibly tough, lightweight design. The VX-3i delivers this and more. Built around Leupold's Elite Optical System, it offers the light transmission, glare reduction, and resolution that diehard hunters and shooters demand for all-day performance.

Everything we put into the VX-3i is there to help you tag out. And like all Leupold riflescopes, it's designed, machined, and assembled in the USA and guaranteed for life.
