.22 Eargesplitten Loudenboomer

The **.22 Eargesplitten Loudenboomer** ("Ear Splitting Louden Boomer") was a **Wildcat Cartridge** developed by **P.O. Ackley** in the 1960's for Bob Hutton, a member of **Guns and Ammo** magazine's technical department. The intent of the cartridge was primarily breaking past the 5,000 feet per second barrier.

Confusion, and Derivatives

It appears to sometimes be described as being a necked down **.50 BMG**, but this is actually *not true*. The cartridge is *actually* based on the **.378 Weatherby Magnum**, necked down to accept .224 caliber bullets. However, according to **Cartridges of the World**. machinist **Zachary Weighman** did make a novelty inert cartridge called the ".22 Earsplitting Loudenboomer", along with a .17 version called the **.17 Incinerator**, both based on the .50 BMG - though the latter seems to be claimed by various creators, so this needs additional verification.

It is unknown if any load for this round by P.O. Ackley or Bob Hutton actually exceed 5,000 feet per second.

Ballistics

One particular load is discussed in **Cartridges of the World**. A 50 grain bullet with 105 grains of H570 powder, achieving 4,600 feet per second for 2,349 ft lbs energy at the muzzle. Again, it's unknown if any other load by Ackley or Hutton ever was able to exceed their 5,000 feet per second goal.

Bullet / Powder (Grains)	Velocity (FPS)	Energy (Ft Lbs)
50 Gr. bullet w/ 105 Gr of H570 powder	4,600 fps	2,349 ft lbs

The .22 Eargesplitten Loudenboomer, designed by **P.O. Ackley**. Based on the **.378 Weatherby Magnum**, necked down to accept .224 caliber bullets. Next to a **.30-06 Springfield** for comparison.

Help Support FirearmWiki

We have a number of ways you can help to support Firearm Wiki, including various affiliates. If you're already in the market for products below, it would help tremendously if you'd consider using our links to buy! It'll give us a commission at zero extra cost to you! Thanks so much for your support!

- Palmetto State Armory** - A major retailer for everything gun-related. Firearms, ammo in all major calibers, and unbeatable deals on AR-15 kits & pre-builts.
- True Shot Gun Club** - An online retailer that specializes in bulk ammunition in all major calibers, including 9mm, 5.56mm, 7.62x39, 12 gauge and many more.
- Brownells** - Founded in 1939, Brownells is a one-stop shop for all things firearms, ammunition, reloading & gunsmithing supplies, and more.
- GritrSports** - A growing retailer who carries all kinds of firearms, ammunition, and various gear and accesories.
- GunMag Warehouse** - Specializing primarily in firearm magazines, ammo in all major calibers, as well as accessories & more!
- Spartan Armor Systems** - One of the leading manufacturers of various body armor, as well as steel shooting targets.
- Black Ovis** - Specializes primarily in hunting gear and various hunting supplies, including archery, camping etc.
- Aero Precision** - A major maanufacturer of AR-15's, offered in a variety of calibers.
- Stag Arms** - A manufacturer of AR-15 type firearms, available in various major calibers.
- Airgun Depot** - A major source for *all* things airguns & accessories, including ammo, CO2 cartridges, optics, targets & more.
