## SPECIFICATIONS

**Bullet Diameter:** 9.52 mm  
**Max Overall Length:** 91.44 mm  
**Max Avg Pressure:** 65,000 psi  
**Rifling Twist:** 1-in-30.5 cm  
**Rifling Lands:** 6  
**Case Capacity (est):** 7.09 cc  
**Primer Size:** 5.33 mm

## NOMINAL PERFORMANCE

**Bullet Weight:** 19.44 gm  
**Muzzle Velocity:** 841 mps  
**Muzzle Energy:** 6,882 joules

"Easy Link" to this cartridge (copy and paste into emails, forums, etc.):  
 .375 Remington Ultra Magnum - <http://ammoquote.com/?catid=311>

(Above dimensions aquired by hand-measurement  
of a .375 RUM case.)

The .375 Remington Ultra Magnum was introduced in 2001, formed by increasing the neck diameter of the .300 Remington Ultra Magnum.

The Remington Ultra Magnum series is derived from the .404 Jeffries, an old British round designed for dangerous African game. Conventional belted cases did not provide the case volume for the level of performance sought by Remington.

From a 24 inch barrel, the .375 Remington Ultra Magnum propels a 300 grain bullet at 2760 fps with over 5000 ft-lbs muzzle energy.

### USING OUR DATA MEANS YOU AGREE TO THESE TERMS

Never directly use a published charge unless it is specifically marked as a starting load. For all other listings, unless otherwise noted, reduce published charges by 3-5% to produce a starting load for your gun. Then, incrementally work up, being watchful for signs of over pressure. Best accuracy may be realized far below a listed maximum charge. One may not be able to actually reach a full published charge if their gun produces greater pressure than was experienced in the development firearm. **Stay alert when reloading - be careful!**
