FAST ACCESS POUCH

With this sophisticated, elaborately manufactured bag, your ammunition is always ready to hand. The outer bag can be attached to your belt. The removable, elastic cartridge case holds six cartridges. Both components are made of Cordura® and Neoprene®. The mounts are made of fine leather. Length-adjustable strap and Velcro® closure for flexible attachment to the arm or on the firearm. As opposed to leather cartridge cases, Cordura®/Neoprene® pouches ensure that the ammunition does not oxidize. It is suitable for all calibers from standard to magnum calibers.
