Product Overview

MidwayUSA has just made a huge purchase of blemished bullets and we are passing the savings to our customers. Blemished bullets are bulk-packaged, factory seconds that didn't meet specification. For majority of the bullets being offered, this blemish is a slight discoloration in the jacket or the bullets were run during press set-up. Hurry, quantities are limited and at these prices they won't last long!

Notes:

- These bullets may or may not have a cannelure present. The presence of a cannelure may vary between boxes.
- The color of polymer tipped bullets may vary between boxes.
- A generic image of a similar bullet is shown.

Blemished Bullet Reloading Tip: Since these bullets do have slight blemishes it is always better to check bullets for defects in diameter before loading

Made In United States of America

WARNING: This product can expose you to Lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to - www.P65Warnings.ca.gov.

Specifications

Product Information
