★★★★★  
After only one use, my Axils quickly became a necessary part of my "grab and go" waterfowl bag! Love them!

★★★★★  
I've been using Axil for years and just recently upgraded to Axil GS Extreme 2.0. I really like the better sound quality and performance of the new GS Extreme 2.0. All day use is not a problem with the fit and comfort. Thank you for making a quality product!

★★★★★  
Used them out hunting got my first 10 pointer deer archery hunting. Would have never heard him coming in the distance without them. Would highly recommend for hunters to Give them a try. I will be wearing them every time I go hunting now. Great product!

★★★★☆  
I like that they are small and I don't have pain from my ear pieces from my glasses being pushed into my head. I like that they don't get in the way when shooting my rifle, I'm not fighting to find the right position for my head set so that I can shoot without them being in the way. They seem to keep the noises out thar need to and let in the ones I need to hear.

★★★★★  
The enhanced hearing with the ability to still handle big calibers being fired and you never get ringing in your ears and still can talk without needing to yell or take off the ear pro.

★★★★★  
Tested these out at the local Cowboy Action match and they worked great! It's difficult to find good in-ear protection that truly cancels out shooting noise but also allows you to hear audio well. These really worked great with hearing instructions and safety protocols while also reducing the noise from the blasts produced by my coach gun! I've tried other brands, but most have fallen out or failed to fully reduce the shotgun noise. These were great! They were recommended to me by other shooters...

★★★★★  
It protects better than my other ear muffs while amplifying talking at the same time.

★★★★★  
Avid shooter and annual attendee of the IV8888 full auto range day. These are the only ear pro I use. This is my second set. My first pair were the 1st generation and they were also incredible, I just lost them. I've been using Axils for years and they've never failed me. My favorite part is being able to amplify voices and still save my ears when the shooting starts. Another favorite part of the axil in-ear protection is not having it shift when I lay my head down on a rifle to shoot like...

★★★★☆  
They've been a great asset to my work life. Previously, I was using a 3M WorkTunes headset 12 hours a day. It got hot, smelly, and unhygienic - going as far as to cause a bad rash around my ears. With the Axil earbuds, my ears aren't sweaty and gross. I can also use standard muff style hearing protection over these when needed, effectively giving me Bluetooth with even the cheapest muffs. Call quality is good, sound quality is extremely dependent on if you get a good seal between your ear and th...

★★★★☆  
All around comfortable hearing protection. Love the ability to amplify hearing while hunting (quacks, grunts, and snapping twigs) yet block out the sound of the gun.

★★★★★  
Love them for the shooting range, I am super excited to wear them during waterfowl and big game hunting. I use them as an Arborist and can't believe how well they perform and dampen the sound of chainsaws with amazing comfort.

★★★★★  
I have been using during everything from running to train for the upcoming hunt, at the range working out my hunting rifle, to listening to podcasts to fall asleep in the back country while on the hunt. They are easily recharged with an extra battery bank and have held charge well. I haven't looked back since purchase.

★★★★★  
STANDARD EQUIPMENT Rifles for me are not the easiest thing. Right handed and severely left eye dominant to start with. Then try and get a good cheek weld with ear muff style protection along with safety glasses over eyeglasses. It is inconsistent at best and uncomfortable as well. The AXIL GS Extreme have made a huge difference. The protection is solid and the ability get a consistent cheek weld has improved my shooting. Adding in the comfort and ability to be fully aware of your surroundi...

These are the best I've used. Nice on an outdoor gun range but not an indoor one. Used them on my tractors both open and closed cabs and they allow me to hear the equipment but dampens it enough to protect the ears. Also used in deer hunting to enhance my bad hearing and protect it at the same time. Highly recommend
