Description

Made in USA

Left-handed helix at the tip of the tap makes chips flow forward, and out of the way, for faster, easier tapping of through holes. Creates less heat and less stress. *SPECS: High-speed steel.*

Available options: 748250356, 748250648, 748250840

2 Flute 6-48 Tap
This design is far better than the 3 flute for hard materials. Three flutes tend to bind and break more often.

Worked Great
I got this to tap some holes in the side of a sporter M1917 receiver for the mounting of a Lyman 48 Peep. Quality made tool, that cut the treads I needed with ease. I also used it to clean up a few scope base holes in another rifle.

I don't normally write reviews...
I don't normally write reviews, unless the product is absolutely phenomenal, or really bad. This tap is the BEE'S KNEE'S! No more 1 turn, back a quarter to break chips, which with a tap this small is something you normally have to do. Not with this tap, as it creates two pigtails that come out the bottom of the hole and stay clear of the cutting edge. AMAZING. This obviously works for through holes, not so much for blind holes, but I won't be using any other taps for through holes from now on.

★★★☆☆
Worked ok
It worked ok on the first hole, but the second one was too much for it... shattered. Good thing I bought more than one. The Amazon one was better...
