## Description

**Schmidt & Bender** is synonymous with quality and precision. This perception has made Schmidt & Bender one of the leading suppliers of precision scopes in the world. As early as the company's start in 1957, Schmidt & Bender has engaged in the development and production of riflescopes that always meet the ever increasing requirements of civilians and law enforcement alike. The new **Stratos** line is no different.

The **Stratos** line from **Schmidt & Bender** offers a few different magnifications to meet the ranging needs of hunters. Stratos scopes are equipped with a programmable "choose your light" illumination\*. Elegant and incredibly fast, Stratos scopes were created with the hunter in mind. The larger size Stratos scopes can do virtually everything asked of them. Long distance shooting is possible through the optional bullet drop compensation. Large field of view and exit pupil make target acquisition easy.

The Schmidt & Bender Stratos line is one of the best long range scopes that will meet the most demanding needs of shooters. While the scope comes with plenty of features, these **accessories** can be a valuable addition to your scope. For what ever your scope may need, **EuroOptic** has you covered.

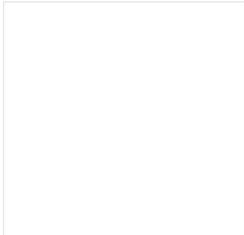

\*Manufacturer Part Numbers (MPN) that start with a "7" do not include the Choose Your Light Illumination feature and instead have the Standard 1-11 Illumination Knob.
