## Description

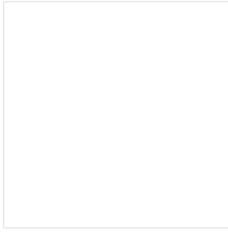

The **P4Xi 1-4x24 Rifle Scope** by **Steiner** makes the perfect addition to an AR platform rifle. It features a compact lightweight design with waterproof, fogproof and shockproof attributes. The one-piece main tube is 30mm in diameter, allowing the scope to utilize the common 30mm scope rings. On 1x magnification, the user can aim with both eyes open for enhanced situational awareness, and the magnification can quickly be dialed up for engaging targets at longer range. It's 24mm objective lens allows for perfect light transmission for a crystal clear picture even in environments with poor levels of light. It's illuminated reticle is night vision device compatible, with 2 night vision modes, 4 low light modes and 5 daytime modes.

Binoculars, Riflescopes, Battle Sights, Rings and Mounts are backed by **Steiners Heritage™ Warranty**. Night Vision Devices, Laser Aiming Solutions, Beacons, and Battle Lights are backed by **Steiner's eOptics 2 Year Warranty**

Just buy it! The edge to edge clarity of this glass is amazingly clear and in a league of its own especially at this price point. You'll need to spend twice as much to get something that might give you marginal better clarity and value. The illumination dot is super small, clear, and extremely daylight bright. The dot size is none obtrusive going out to distance giving pinpoint shot placement. The reticle is... [read more](#)

Tom May 17, 2018

The US made scope is perfect in every way-from the brightness and edge to edge clarity of the glass to the fit/finish/smoothness of the mechanism and the ideal illuminated reticle which provides my older eyes a perfect dot rather than the 'comma' that was present when I looked through the very high end 'red dot' sight that this scope replaced. Why mess around with 'red dot' sights when you can have a 1-4 scope (the... [read more](#)

David Harris May 9, 2023

The best 1-4. Clearer, brighter than all others. Best edge to edge clarity.

John July 13, 2020

The glass on this scope is amazing, especially at this price point. Edge clarity is really good and it is very, very, close to 1x. I have to look hard to even see it the magnification. The dot is daylight bright and works just fine with a weaponlight. Another plus is despite having a strong astigmatism in my dominant eye, the dot is almost perfect even without my glasses which correct for the astigmatism. Lastly, I... [read more](#)

Craig Thompson August 7, 2019

I've had mine for about a year and a half...it's flawless in every way. When Steiner advertisers claim the P4Xi to be a true 1X they're spot on. There's absolutely zero peripheral aberration on the 1X setting. In addition, the illuminated red dot also allows this scope to be used as a CQB optic. The clarity at 1X is every bit AS GOOD as any of the upper tier red dot optics costing hundreds of dollars more. There's... [read more](#)

mike April 15, 2020

My Comments - Very clear and bright image quality. As good or better than scopes costing twice the price (Vortex Razor CBQ). - Image quality is EXCELLENT. Very good color contrast but not as good as a Tract Toric. - Center illuminated Red Dot is very precisely small and bright. Best red dot image of any scope I've ever seen. The entire reticle does not illuminate. Only the red .76 moa center dot is illuminated. - '... [read more](#)
