**?** I have a Henry Long Ranger 309 (lever). I am looking at the 1-4x24 LPVO. This is the first time I've heard about a rail mount on the scope (hence avoiding rings). Will this work on my rifle?

Dear Sir,

thank you for contacting us.

Please note that Steiner Ranger 4 1-4x24 requires the Zeiss ZM/VM rail underneath, which means that you will share an according mount for your rifle. Do you already have a Picatinny rail on your rifle? Please share this information with us directly at info@optics-trade.eu for further assistance in this regard.

Should you require any further assistance, please do not hesitate to contact us again at info@optics-trade.eu

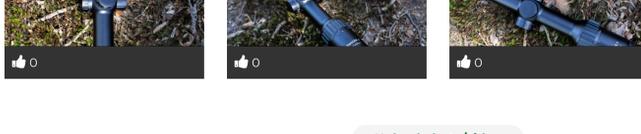

Kind Regards,
