Trigger Guard Assemblies Post 1964

Note - Please call for the center-to-center distance for the Long Action receiver and for the Short Action receiver. We do not build trigger guard assemblies for the WSSM length receivers.

Standard Long Action

Model 710 - This standard trigger guard assembly is made to utilize the factory magazine box. It will accommodate either the standard length (30-06) or the longer (.375 H&H) box. Utilizes the factory magazine box, spring, and follower. Mild steel construction.

710A - Long Action, Standard depth. Utilizes the factory magazine box, spring, and follower. Aluminum construction.

Standard Long Action Stainless

Model 715 - Long Action, Standard depth. Utilizes the factory magazine box, spring, and follower. Stainless steel construction.

Model 720 - Short Action, Standard depth. Utilizes the factory magazine box, spring, and follower. Mild steel construction.

Standard Short Action

Model 720A - Short Action, Standard depth. Utilizes the factory magazine box, spring, and follower. Aluminum construction.

Standard Short Action Stainless

Model 725 - Short Action, Standard depth. Utilizes the factory magazine box, spring, and follower. Stainless steel construction.

Drop Short Magnum

Model 730 - Long Action (.300 Win. Mag), Drop depth. Utilizes the factory magazine box, spring, and follower. Mild steel construction.

Drop Short Magnum Stainless

Model 735 - Long Action (.300 Win. Mag), Drop depth. Utilizes the factory magazine box, spring, and follower. Stainless steel construction.

Drop Long Magnum

Model 740 - Long Action (.375 H&H), Drop depth. Utilizes the factory magazine box, spring, and follower. Mild steel construction.

Drop Long Magnum Stainless

Model 745 - Long Action (.375 H&H), Drop depth. Utilizes the factory magazine box, spring, and follower. Stainless steel construction.

Drop X-Long Magnum

Model 750 - This drop trigger guard assembly is made to accommodate the longest cartridges that will fit into the new Model 70 "Classic". We make a custom magazine box that has an internal length of 3.800". Since this obviously requires modification to the bottom of the receiver, we only sell it to qualified gunsmiths.

Drop X-Long Magnum Stainless

Model 755 - This drop trigger guard assembly is made to accommodate the longest cartridges that will fit into the new Model 70 "Classic". We make a custom magazine box that has an internal length of 3.800". Since this obviously requires modification to the bottom of the receiver, we only sell it to qualified gunsmiths. The Model 755 is made from 416 stainless steel.

Drop Remington UltraMag

Model 760 - This drop trigger guard assembly is made to accommodate the large "UltraMag" cartridges. We make a custom magazine box that has an internal length of 3.635". Since this obviously requires modification to the bottom of the receiver, we only sell it to qualified gunsmiths. The wider box will hold 4 rounds, plus one in the chamber.

Standard Remington UltraMag

Model 770 - This standard trigger guard assembly is made to accommodate the large "UltraMag" cartridges. We make a custom magazine box that has an internal length of 3.635". Since this obviously requires modification to the bottom of the receiver, we only sell it to qualified gunsmiths. The wider box will hold 3 rounds, plus one in the chamber.

Standard Winchester Short Mag

Model 780 - This drop trigger guard assembly is made to accommodate the larger diameter "Short Mag" cartridges. We make a custom magazine box that has an internal length of 3.075". Since this obviously requires modification to the bottom of the receiver, we only sell it to qualified gunsmiths. The wider box will hold 3 rounds, plus one in the chamber.

790 - Short Action, Drop depth. Utilizes the factory magazine box, spring, and follower. Mild steel construction. Perfect for the WSM cartridges.

795 - Short Action, Drop depth. Utilizes the factory magazine box, spring, and follower. Stainless steel construction. Perfect for the WSM cartridges.
