Swarovski Habicht 10x40 W GA Details

Habicht 10x40 model made in Austria is a **Porro-prism** binocular with incredible light gathering ability due to **wider angle**. 10x magnification makes them suitable for observations in **large open areas** and mountains and 40mm objective lenses with Porro prism setting will draw in plenty of light even in **low-light** conditions. This model is available in two different types of armor. You can choose between very attractive **black leather** texture combined with black metal armor suitable for every hunting enthusiast or **green rubber armoring** very convenient when you're looking for traditional design with more protection and able to withstand the test of time. GA model is protected against impacts, abrasions and sound. They are also purged with nitrogen gas that makes Habicht impervious to water, internal fogging and corrosion. They are extremely **durable**, tough and enough lightweight for making your wearing less tiresome. The look through is also incredibly stunning, **bright, sharp** and **colorful** images are right at your fingertips. Stunning 3D look significantly enhances your visual experience by providing incredibly lifelike images you will never see in any roof-prism binocular. Focus is adjusted by central focus wheel and right-eye diopter. We suggest that you try them on since the don't provide twistable eyecups mechanism.

Short Description of Swarovski Habicht Binoculars

For 45 years **Swarovski Optik** satisfies its customers with **Habicht series**. The new generation of Habicht still offers traditional design but this time with advanced optic technology. This Porro-prism setting provides incredibly bright view-through, with **vivid colors** and razor-sharp images. They perform incredibly well in **dim light** situations due to excellent gathering ability with the help of Swarovski multi-coatings, even up to 96% which you'll never come across any roof-prism binoculars. W models have a very **rich 3D look-through**, wider angle and you can also choose between black rugged leather armor or modernized green rubber armor (GA models). GA models are protected against impacts, abrasions and are even sound proof, very convenient for advanced applications in military, law enforcement, navy and marine occupations. Very lightweight body makes these binoculars less tiresome to carry for extended periods of time. **Nitrogen filled** construction that appears watertight abilities and also eliminates internal condensation that occurs due to temperature fluctuations. You can even submerge them to a water depth of 3 meters making this Habicht one of a kind among Porro-prism binoculars. Habicht have **central focus** wheel and **right-eye diopter** for adjusting the proper focus, but eyecups have only one position so we recommend trying them on before the purchase to see if you are able to set a suitable eye relief for comfortable viewing.

Features of Swarovski Habicht Binoculars

- Multi-coated lenses (Swarstop)
- Phase Correction
