1/9

Description

[Firearms, optics, and rings are for display only and NOT included]

NOTE: works for Swedish Mauser M38, M96, and M96/38 with BENT bolts ONLY. Does NOT work for Model 1894 Carbine or any other models.

- No drill, no tap, no permanent modification to your Swedish Mauser
- No need to remove the upper handguard, retain the original military appearance
- Low profile design allows comfortable cheek weld
- No gunsmith required, installed in 20 minutes!
- The ingenious arc-shape base design ensures perfect bore alignment for the scope mount
- Solid steel base nut guarantees the rock-solid mounting

NOTE: For the M96 rifle with a straight bolt - A bent bolt is required to clear the scope. An M38 bent bolt **with correct headspace** can be used but a small part of the M96 stock needs to be filed down so the bolt can close completely.

Package contents:

- One steel base receiver nut and base screw
- One aircraft grade aluminum alloy base with full-length picatinny rail
- One torx wrench and removable threadlocker

Installation video:

The rifle scope and rings used in the shooting video:

- Leupold VX-Freedom 3-9x40mm
- Vortex Pro Series 1 inch Rifle Scope Rings, Medium

Wayne S. ★★★★★

I just mounted my 4th one. They are superb. These two styles are on my Swedish M38 and Swedish M96/38.

It was simple to install and I was surprised that it would hold zero. It does flex a little too much for my liking but I was able to hold fairly decent groups at 200 yards. All in all it was a great buy for the money. I really like the no drill feature for my collectable mil surps. I'll have to try some of the other mounts.

★★★★★

I purchased the mount a while back for the main reason that I have a Swedish M38 that I want to use for deer hunting here in Arizona. The rifle had already been put into a different stock so no lost collector value there. The mount went on easy as I expected it too, directions are very plain and easy to follow. A couple of trips to the local range and it's dialed in for a 200 yard zero with my hand loads. I am very satisfied so far with it and expect no problems come the hunt this year. Looks g...

★★★★★

This is the perfect non-permanent alternative to mounting a scope to an M38 Mauser, as deserving a WWII period rifle as any.

★★★★★

This full length mount for the M96/38 Swedish Mauser is outstanding!! Very easy to install (my son did it) and it stays secure. Only touches the front part of the receiver. Very strong and scope holds zero. Strongly recommend this mount for anyone looking to get one.

★★★★★

I bought this mount to replace the scout mount I had purchased previously. The rifle shot this group with that mount and an ancient Tasco pistol scope. The new mount is installed, mounting a Vortex Viper PST scope. Easy to install. I haven't fired it yet, but if it works as well as the one in my My 39 Finn, I will be very pleased.

Wanted to put a higher powered optic on my M96 (6.5x55 Swede). I had the scout mount and a 7x scout scope on it used the longer mount to go to a 16x. So a very easy upgrade indeed. Very solid and I was able to shoot some 300 yard steel in just a few minutes. Very nice mount.

The mount I bought for my Swedish Mauser fits better than a glove! I am extremely pleased with the quality as it far exceeded my expectations. I will be purchasing mounts for my Mosin Nagant as well as my Czech Mauser

★★★★★

I had not mounted any glass to this base yet because I am still waiting on it to arrive, but I got this base in and as soon as I unboxed it, I was immediately impressed. The ingenuity and machine work are flawless. It installed in literally minutes and was super simple and straight forward. I was a little concerned with stability while shooting since all the securement looks to be in the front where it mounts, but once I saw how it was made and got it installed, I realized that it will be rock ...

I had the gen1 before but this is a lot better no longer need a long relief sights, fitting is the same and still very stable, mounted on my Swedish Mauser 6.5 x 55.

Easy fit, now all shots on target. Not bad for a 1917 ex-battle rifle. Thanks Badace.
