No swivel stud on your shotgun forearm? Want to mount a sling on your lever action rifle's magazine tube? Our GT™ Barrel Band Swivel Sets are your answer. Our one and two-piece barrel band sets fit almost any firearm from a .22 rimfire magazine tube of .420" diameter up to shotgun barrel with a .900" diameter.

NOTE: Choose the correct barrel diameter in the drop down menu above to ensure the proper fit.

Always verify the diameter of your mounting surface prior to ordering.

question on Barrel band.

What size do I need for a 28 ga. over under shotgun? I bought a GTSW300 and it was too big & missing the set screw .

Thanks
tasahs@northportbuildingsupply.com on Dec 15, 2023

Excellent Customer Service!!

Had a couple application questions on an old Savage 99. Barrel band swivel vs forend mount, etc. Alan Nguyen not only did an awesome job of answering my application questions, but helped me locate the kit with one of their customers when my meager internet search results yielded nothing! Above and beyond the call of duty! Thanks Alan.

I need four sets of "Two Piece Barrel Band -Swivel Sets".

I need Quantity 2 sets of... GTSW40 (range .420"-.470" Dia.) and Quantity 1 set of ...GTSW300 (range .540" - .590" Dia.), plus Quantity 1 set of GTSW43 (range .630" - .675" Dia.). Your site said "Sold Out". Please tell me when you can supply them.

Sincerely,
Wayne Johnston

Inaccurate Instructions

Instructions for installing rear swivel call for a 5/32" hole. I did this, working up from a small bit to 5/32" so as not to crack the finish. Th screw-in swivel dropped in with the threads barely touching the sides. I had to use a screw hole repair kit to get it to bite. Otherwise the kit works as advertised.

GTSW301 barrel band set

This is a high quality product....no disappointment here.

Reasonable cost and prompt shipping made this a fine deal.
