Is the rifle pre 64 or post 64?

Given this is a 'new' rifle, it's safe to assume the original poster is talking about the action. Pre-64 refers to the controlled feed claw extractor that existed on the Model 70's made pre-guessed-it-before 1964. At that time Winchester moved to a 'cheaper to produce' push feed action. Around 1989, the Pre 64 action was reintroduced. This rifle (I have the .416 Rem version of it) has the Pre-64 action.
