Work Sharp Knife & Tool Sharpener MK II 220V

The Mk.2 Knife and Tool Sharpener is an improvement upon the original Work Sharp Knife and Tool Sharpener; which was the first knife sharpener designed to sharpen every knife you own. Building on that success the new Mk.2 provides even more sharpening benefit for the avid knife user. Using 1/2" x 12" flexible abrasive belts in coarse, medium and fine grits (P80, P220, 6000) the sharpener is able to sharpen not just straight bladed knives, but also curved knives, tanto blades, filet knives, serrated knives, gut hooks and virtually any other shape of knife blade. The Mk.2 provides an improved precision sharpening guides to ensure that you get the proper angle every time. Quickly toggle between the 25° angle for hunting and outdoor knives and the 20° angle for thinner blades and kitchen knives. The New Sharpening Guide also provides an Edge Guide to support the blade during the entire process making it more precise and repeatable. New two speed power delivers a low speed for more control when sharpening a knife, yet still provides all the power you need for heavier sharpening and grinding tasks on tools like lawnmower blades, axes and other common lawn and garden tools. Speed control is ergonomically placed within reach to make speed adjustments fast and easy when sharpening. This combination of speed control, precision guide and flexible abrasive belts let you sharpen your blades to hair popping results with speed, ease and repeatability. This is the fastest and easiest way to get your knives as sharp as you need them to be. Stop tolerating dull knives and time consuming sharpening methods! Professional knife makers use flexible belts to put a razor sharp edge on their blades, and now you can have the same technology at home to use any time your knives get dull. You may already have other sharpening methods, but never before has a knife sharpener been able to quickly and easily sharpen this broad range of knives to such extremely sharp results.

- The Work Sharp Knife and Tool Sharpener Mk.2 brings New and Improved features to make sharpening even faster and easier
- Sharpens every knife you own using Flexible Abrasive Belts and a redesigned Sharpening Guide
- It sharpens outdoor, pocket and kitchen knives, even serrated knives, scissors, and many other common edge tools
- The redesigned Sharpening Guide increases precision and repeatability to get the proper edge angle every time, while the new Edge Guide supports the knife all the way to the tip
- Functions as a hand held detail grinder
